EASTERN GUILFORD FIRE – CLASS II ROOF FIRE & LACK OF SPRINKLERS

A representative from the Guilford County Fire Marshal's office will be speaking on the November 2006 fire at Eastern Guilford High School. The type of building construction that contributed to the spread of the fire will be discussed, as well as the difficulty in trying to control it. This is a common type of construction used throughout North Carolina and learning its dangers and how to address fires in these structures will be interesting and beneficial to everyone.

BUSINESS MEETING: There will be a short business meeting following our speaker.
